Professional Summary

Full Stack Developer with 5+ years of experience building production SaaS platforms, multi-tenant dashboards, and booking systems with React.js, Next.js, TypeScript, Node.js, and Supabase/Firebase. Shipped end-to-end products covering authentication, role-based access control, REST API integrations, real-time features, and cloud deployment. Built AI-powered recommendation microservices with Python FastAPI and scikit-learn. Experienced working with remote, cross-functional teams on multi-client projects.

Technical Skills

Frontend: React.js, Next.js (App Router), TypeScript, JavaScript, Angular, Tailwind CSS, shadcn/ui, Framer Motion, HTML5, CSS3

Backend: Node.js, Express.js, RESTful APIs, Python, FastAPI, PHP, Laravel, Socket.IO (WebSockets)

Databases & BaaS: PostgreSQL (Supabase), MongoDB, MySQL, Firebase (Firestore, Auth, Cloud Functions)

Auth & Security: JWT, OAuth 2.0 (Google), Two-Factor Authentication (2FA), Role-Based Access Control (RBAC)

Cloud & DevOps: AWS (S3), Vercel, Netlify, Render, Docker, Jenkins, CI/CD, Git, GitHub

AI/ML: scikit-learn, TF-IDF Vectorization, Cosine Similarity, Recommendation Systems

Experience

Full Stack Developer – CalibreOn International (NorthSpex) 2025 – Present

- Build scalable web and SaaS applications for multiple clients using React.js, Next.js, and Node.js
- Design and develop RESTful APIs and system architecture for client projects
- Manage cloud-based deployments and contribute to UI/UX design across the software division

Full Stack Developer – TeraBit IT Company 2024 – Present

- Built Primus Booking, a 3-portal SaaS ecosystem (Customer, Business, Admin) using Next.js, TypeScript, and Supabase
- Developed an admin panel for an AR-based web application with dynamic components and real-time content management
- Contributed to a Turkish classifieds e-commerce platform modeled on Sahibinden.com
- Built the company website in React.js with a modular, SEO-friendly component architecture

Frontend Developer – Social Swirl (Remote) 2024

- Built responsive React.js interfaces for production web applications in a fully remote team
- Collaborated with design and backend teams to integrate APIs and ship UI features
- Created reusable components that standardized layouts and improved UX consistency

Projects

Primus Booking – Multi-Platform SaaS Ecosystem Mar 2025 – Present

Live: primusbooking.com | biz.primusbooking.com

- Architected a booking platform with separate Customer, Business, and Admin portals on Next.js App Router + TypeScript
- Implemented Supabase Auth with email, Google OAuth, email verification, and password recovery
- Enforced role-based access control across all portals using Next.js middleware
- Built booking, scheduling, and reward-points modules on PostgreSQL (Supabase)

SkillBridge – AI-Powered Skill Exchange Platform

Jun 2025 – Present

Live: skill-bridge.me

- Built a full-stack MERN marketplace matching students with teachers through AI-driven recommendations
- Developed a recommendation microservice using TF-IDF vectorization and cosine similarity (Python FastAPI + scikit-learn), deployed on Render
- Implemented real-time chat with Socket.IO, including typing indicators and online presence tracking
- Secured accounts with JWT, Google OAuth, and optional two-factor authentication (2FA)
- Built a credit system, meeting scheduling, Cloudinary uploads, and Nodemailer email notifications

AdPulse – Google Ad Manager Revenue Dashboard

Aug 2025 – Present

Live: adpulse.monetize360.eu

- Built a multi-tenant revenue analytics dashboard for Google Ad Manager (GAM) publishers
- Integrated the GAM REST API for scheduled ingestion of impressions, clicks, and revenue data
- Implemented Firebase Auth with custom claims for admin and publisher roles
- Developed a server-side revenue-share engine applied per site or per user via Cloud Functions
- Built an admin panel for user management, site approval, and payout lifecycle tracking
- Secured data with Firestore security rules and optimized queries with composite indexes

Beam Balance – Document Management System

Feb 2025 – Present

- Built a secure document management platform with Next.js and AWS S3 file storage
- Developed admin and client dashboards for document upload, retrieval, and tracking

FIM IT – Augmented Reality (AR) Admin Panel

Jun 2024 – Oct 2024

Live: fim-it.com

- Developed the admin dashboard for an AR-based web application with real-time content management
- Built dynamic, reusable UI components for user, content, and AR asset management

TeraBit IT Company – Corporate Website

Mar 2024 – May 2024

Live: terabitit.com

- Built the corporate website in React.js with a modular component architecture and modern UI/UX
- Implemented responsive layouts, performance optimization, and SEO-friendly page structure

Monetize 360 Global – Marketing Website

Oct 2025 – Nov 2025

Live: monetize360.global

- Built an SEO-optimized marketing site with lead funnels, EmailJS contact forms, and Framer Motion animations
- Configured Google Ads conversion tracking for monetization

Organization Task Tracker

Sep 2023 – Jan 2024

Demo: youtube.com/watch?v=uwpQyfTYeJ0

- Developed a task management system with Angular and Laravel, featuring RBAC, task tracking, and reporting

Education

BS Computer Science – COMSATS University Islamabad

2020 – 2024

Certifications

Building RESTful APIs with Node.js and Express – LinkedIn Learning	2025
Microsoft Azure Essentials – Microsoft Press (LinkedIn Learning)	2025
Freelancing Certification – DigiSkills (ID: KCWNYXBPQ)	2021

Languages

English (Professional), Urdu (Native)
